

CTF-05

CTF-05 is a stone wool tapered system used in warm roof applications to create suitable falls under any compatible single ply or bitumen based membrane system. This system provides excellent thermal performance and available with falls of 1:60, 1:80 and 1:120 (subject to quantity).

Stone wool is non-combustible with a class A rating and also gives excellent acoustic performance.

Technical Data

U Values

Each scheme is individually designed to achieve the required U value. Contact our technical department for further information.

Installation

Must be installed in accordance with manufacturer's recommendations. Contact our technical department for further information and compatibility.

Features

- CFC, HFC and HCFC-free
- Ozone Depletion Potential of zero
- Global Warming Potential <5
- BREAM A rating (system dependant)
- Easy handling and installation

Technical Data

Thermal Conductivity	0.039 W/mK
Board Size	1200 x 1000mm (flat packers) 1200 x 1000mm (tapered)
Thickness	Designed to achieve the required U value
Fixing	Fully bonded with non-solvent PU adhesive Mechanically fixed with thermally broken fasteners
